About the Amazon

The Amazon is the largest tropical rain forest in the world. It's astonishingly rich in biodiversity, which makes it great for holidays focused on adventure and nature.

The Amazon represents over half of the planet's rainforest and extends to some 5,000,000 km². This vast region spans nine nations, with 60% of it contained within Brazil. Wildlife here is rich and diverse, and some of the species that call this place home include: jaguars, primates, deer and colorful birds, such as the macaw.

Through the rainforest flows the mighty Amazon River. It is the world's most abundant river, with a total flow greater than the next top eight longest rivers combined. In fact, locals often refer to it as 'the river sea'.

Our tailor-made Amazon trips allow guests to discover this fascinating region in style.
